

Rhozly

Brand Guidelines

The building blocks of the Rhozly identity — logo, colour, type and the visual language of the app — so anything you make looks unmistakably like us.

Logo

Colour

Typography

Components

THE LOGO

A rose with a power button

The mark fuses a **rose** — growth, care, the garden — with a **power symbol** at its heart: technology that helps things grow. Green leaves ground it. It reads at any size and is the single most recognisable piece of the brand.

PRIMARY LOCKUP — ON LIGHT

Rhozly

ICON ONLY

ON DEEP GREEN

Rhozly

APP ICON

The rose

Care, growth, the joy of gardening — warm and human.

The power mark

The tech at the centre — sensors, AI, automation quietly at work.

The leaves

Rooted, living, grounded in the real outdoors.

Do

- ✓ Keep clear space around the mark — at least the height of the power button.
- ✓ Place the icon in a white rounded tile on dark or busy backgrounds.
- ✓ Use the full-colour mark wherever possible.

Don't

- ✗ Recolour the rose, stretch it, add shadows or outlines.
- ✗ Place the red rose directly on green or red — always tile it in white.
- ✗ Rebuild the wordmark in another typeface (it's Plus Jakarta Sans).

COLOUR

Deep green, grown from a warm neutral

One confident green does the heavy lifting, on a warm off-white ground. The rose red belongs to the **logo only** — keep it out of the interface so the mark stays special. Every value below is a live design token from the app.

BRAND GREEN

Aa Rhozly Green #075737 Primary. Buttons, links, active nav, key accents.	Aa Green Container #2a704d Softer green for fills, hovers, secondary surfaces.	Aa Deep Green #063d28 Headers & immersive bars (as a gradient with the primary).	Aa Green Tint #e6efe9 Quiet green background for chips and callouts.
---	--	--	--

LOGO COLOURS — MARK ONLY

Aa Rose Red #e80d2a The logo rose. Not a UI accent colour.	Aa Leaf Green #478e5c The logo stem & leaves.	Aa Tertiary Rose #ffdad8 A soft pink echo of the rose for gentle highlights.	Aa Error #b91c1c Destructive actions and error states only.
--	---	--	---

NEUTRALS & SURFACES

Aa Background #faf9f7 The app canvas — warm off-white.	Aa Surface Low #f4f3f1 Inset fields, subtle wells.	Aa Surface #efeec Secondary buttons, muted tiles.	Aa Surface Lowest #ffffff Cards & sheets sit on white.
Aa On-surface #1a1c1b Primary text — a near-black with a green bias.	— Outline rgba(26,28,27,.15) Hairline borders & dividers.		

Accents that carry meaning

Beyond the brand green, a small set of functional colours signal what's happening — warnings, watering, success, AI. They're drawn from the standard palette and always used **softly**: a pale 50 fill, a 200 hairline border, and 700/800 text. They inform; they never out-shout the green.

ACCENT FAMILIES

Aa Amber #f59e0b Warnings & weather — heat, wind, sun, golden hour, sow-by soon.	Aa Orange #f97316 Stronger caution — heatwave emphasis, pollen high.	Aa Blue #2563eb Watering & water, calendar, informational links.	Aa Sky #0ea5e9 Light & sensor readings, cooler info.
Aa Emerald #10b981 Success & healthy — "Soil OK", done, Sprout tier.	Aa Violet #8b5cf6 AI & premium — Sage tier, admin, Garden Layout.	Aa Rose #f43f5e Watchlist & soft pink accents.	Aa Red #dc2626 Overdue, errors, destructive actions.

ALERT & STATUS BACKGROUNDS

 Heatwave ahead — up to 34°C. Your outdoor plants will need extra water.	 Rain forecast — you can skip today's watering.
 All caught up. Nothing urgent today.	 1 overdue task — catch up before they pile up.

Recipe for every alert tone — background {colour}-50, border {colour}-200, text {colour}-700 / 800. Swap the hue, keep the shades.

STATUS CHIPS

1 OVERDUE	WATERING	SOIL OK	20,000 LUX	SAGE · AI	WATCHLIST	HEAT	EVERGREEN

Plus Jakarta Sans, paired with Inter

Headlines carry personality in **Plus Jakarta Sans** — geometric, friendly, a little characterful. Everything you read sits in **Inter** — quiet, legible, endlessly workable. Two families, clear jobs.

DISPLAY & HEADINGS

Plus Jakarta Sans

Weights 400–800 · tighten tracking (-0.02em) on large sizes · used for the wordmark, page titles and card headings.

Regular Medium SemiBold Bold

THE TYPE SCALE

Display · 40 / 800	A gardener's brain
H1 · 28 / 800	Your garden, connected
H2 · 20 / 700	Today's tasks
H3 · 15 / 700	Raised Bed A
Body · 14 / 400	Point your camera at any plant and Rhozly identifies it.
Label · 10 / 700 · caps	NEEDS ATTENTION

Soft, rounded, generous

Rhozly's UI is calm and tactile: deeply rounded corners, roomy padding, soft shadows, and pill-shaped controls. Green leads; the neutrals let the garden's own colours (plant photos) shine.

BUTTONS

**Primary action****Secondary****Outline**

Pill radius **999px** · primary **#075737** · weight 700.

CHIPS & BADGES

EVERGREEN**1 OVERDUE****WATCHLIST****SOIL: OK**

Small caps, letter-spaced, radius **6–8px**, tinted fills.

CARDS

Back Garden

Outdoors · 2 areas · 9 plants

White on the cream ground · radius **16–24px** · soft low shadow · hairline **outline** border.

IMMERSIVE HEADER

**Rhozly**

Deep-green gradient **#063d28 → #075737**, white logo & text.

PRINCIPLES

Warm, not clinical

Off-white grounds and rounded forms — a tool that feels like a companion, not a spreadsheet.

Green leads, colour follows

One green does the work. Let plant photography bring the other colours.

Plain-spoken

Say what a control does. "Log yield & complete", then "Logged." Specific over clever.

ICONOGRAPHY

One icon set, used with intent

Every icon in Rhozly comes from **Lucide** — a single open-source family on a 24px grid, drawn with 2px rounded strokes and no fill. That one-family consistency is the point. Icons inherit the colour of whatever they sit on (usually the brand green), and anything actionable always pairs its icon with a text label. These are the **249 icons** in the app today, grouped by the job they do.
